The numbering of the newly submitted claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered newly presented claims 1-11 have been renumbered as claims 64-74 in accordance with 37 CFR 1.126.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 64-66, drawn to a process for making enhanced activated carbon, classified in class 502, subclass 417.
- II. Claims 67-74, drawn to a device for purifying water with activated carbon, classified in class 210, subclass 282.

The above noted inventions are independent and/or distinct from one another for the following reasons:

Inventions I and II are related as process for making a product and apparatus for using the product. The inventions are distinct if it can be shown that either: (1) the product made by

Art Unit: 1724

the process as claimed can be used in another materially different apparatus, or (2) the apparatus as claimed can be used with another and materially different product. In this case the product made by the process of Group I can be used in another manner, other than in the apparatus of Group II. For example, this material could be used in a device for removing organic contaminants, instead of chlorine, from water or air.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, and because the searches for the individual Groups are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

In addition to the above restriction requirement, an election of species is also required. This application contains claims directed to the following patentably distinct activated carbon modifying compound species of the claimed invention:

- (1) potassium iodide;
- (2) ammonium carbonate; and
- (3) ammonium sulfate.

Serial Number: 09/923,764

Art Unit: 1724

Applicant is required under 35 U.S.C. 121 to elect a single disclosed activated carbon modifying compound species to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, all claims are generic.
